2010-2011 Annual Report
Dear members and friends,

As I end my journey as the President of the Shastri Indo-Canadian Institute, I wish to acknowledge the support extended by each and every one of you. It would certainly not have been possible for me to promote the Institute’s mission and pursue the vision I have for SICI without the tremendous goodwill you have shown me.

Saying ‘Goodbye’ is always easier when there are achievements to look back on. I take great pride in reaching the Quebec Agreement, opening doors to other provincial governments, and initiating new partnerships with Saskatchewan and Alberta; but, the biggest achievement for me is my brainchild, the delegation of Indian University Vice-Chancellors, which I strategically called the ‘Shastri Delegation’. Additional important achievements include bringing the University of Calgary back to our group of Canadian Member Institutions. Many thanks to Dr. Harvey and Dr. Canon for making this possible. My sincere thanks also go to Dr. Lloyd Axworthy, President of the University of Winnipeg, for joining our bi-national network of Member Institutions. Going forward, I know the Executive Council will continue pursuing our goals, working on our objectives and branching out in new directions. The Shastri Indo-Canadian Institute, I believe, can keep reinventing itself in innovative ways through the committed work of its EC members & Canadian and Indian member councils.

Ending my tenure on a high note with the Education Summit is especially rewarding. I wish to also thank the EDs I worked with (Rick Butler and Michèle Neider). I cannot help but mention my soldiers in the entire India office, their efforts have been stupendous and their work exemplary. My best wishes and blessings will always be with each and every one of them.

Sincerely,

Prof. Sunaina Singh

The Shastri Indo-Canadian Institute is a unique bi-national organization that promotes understanding between India and Canada primarily through facilitating academic and cultural activities and exchanges. For more than 40 years, the Shastri Institute has been instrumental in building the foundation of trust, understanding, respect and goodwill crucial to a positive relationship between these two great countries.

Founded in 1968 by an agreement between the governments of Canada and India, the Shastri Institute has served as the premier academic bridge between the two countries. Our role is to create linkages between Canadian and Indian stakeholders in academia, government and business. The institute is named after Lal Bahadur Shastri, respected Second Prime Minister of India 1964-1966.

Our Vision
Shastri envisages compassionate, progressive, sustainable civil societies in India and Canada. This includes an interconnected and empowered India-Canada community fostered by mutual trust and respect.

Our Mission
To improve the quality of life of the peoples of Canada and India by building and strengthening intellectual and cultural linkages through research, dialogue and exchange.

Our Mandate
Shastri builds academic and cultural relationships between India and Canada by providing programs and services that facilitate and sustain bi-national dialogue, understanding and interaction. These relationships encompass both institution-to-institution and individual-to-individual linkages.
The 2010-2011 fiscal year proved to be an exciting one with many new initiatives. I started this position in January 2011 and we worked on various funding proposals, reports, workshops, a new web portal, conferences, cultural events, and new member solicitations. I believe we have built a strong and coherent bi-national team. For the 2011-2012 fiscal year, we will continue to work on our Strategic Plan and promote The Year of India in Canada, among other initiatives.

I look forward to working with the incoming president Dr. Braj Sinha. Although my time with the current president Dr. Sunaina Singh has been short, it has been a true pleasure working with her and assisting her in many endeavours which have increased Shastri’s reputation and profile. I have been inspired by her perseverance, commitment, dedication and the countless hours she devoted to Shastri.

Finally, we look forward to another year of activities that will serve our members and will see Shastri embrace new initiatives that will benefit the collaboration and linkages between India and Canada for years to come.

Michele Neider
Executive Director

A Message from the Executive Director

“These months in India made a very positive impression on me, and they will certainly be helpful in the classroom. I regularly teach two world history courses, a survey of the post-1400 period and a seminar on the early-modern world. India has always played a central role in both, but the training I received from this fellowship will inform my lectures, primarily adding texture through colourful details. I will also be far more able to advise students doing research on Indian history about available resources. As well, I came to know my colleagues in India, especially in Goa, with whom I will remain in contact.”

Luke Clossey, Simon Fraser University - India Studies Fellow

Church of St. Lawrence near Fort Aguada - Sinquerim, India

During his research trip to various archives, museums and libraries in India, Luke visited rare collections of theological manuscripts and imagery. His studies of these valuable examples of religious images, texts and architecture will be included in a history of early-modern religion.
Putting Knowledge to Work

Shastri's Millennium Development Goals (MDG) Research Grants provide bi-national research teams with opportunities to undertake research projects that significantly impact development policy by focusing on one or more of the eight United Nations' Millennium Development Goals.

Eradicate extreme poverty and hunger
Achieve universal primary education
Promote gender equality and empower women
Reduce child mortality
Improve maternal health
Combat HIV/AIDS, malaria and other diseases
Ensure environmental sustainability
Develop a global partnership for development

Reducing poverty, improving the lives of women and youth, and increasing the pace of development in a sustainable manner, our MDG research projects are designed to produce manifold outcomes. On one hand, the expertise our grant recipients bring improve the lives of the marginalized poor by helping them build self-sustaining economic foundations. On the other, the bi-national collaborative aspect increases research capacity on multiple levels by promoting people to people and institution to institution relationships, exchanges and linkages between Canada and India.

In 2010-2011, Shastri awarded one new research grant to a bi-national team whose project supports the Millennium Development Goals. Dr. Steven Newmaster, from the University of Guelph, and Dr. Nimala Balsinuramaniam of the Centre for Biocultural Diversity in India are working on a project to assemble traditional aboriginal biodiversity knowledge toward an engendered cultural approach - with the objective of developing environmental sustainability policy that preserves and values biological and cultural diversity.

During their first year of field research, the team developed strong collaborative ties with the tribal peoples in the Nilgiri Biosphere Reserve in Tamil Nadu, South India. Local community interactions were enthusiastically encouraged in the hope that the team would build their knowledge on sustaining healthy lifestyles and the environment.

In the case of ‘Seengai’ - a wild, lesser known edible legume in their efforts to promote the use of locally available and under-utilised natural and agricultural resources. Human-powered machines (hand-operated seed oil presses and pedal-driven reactors) extract the oil from locally harvested and forest nuts. The oil is then converted into environmentally friendly ready-to-use biodiesel.

The locally produced biodiesel helps secure the village’s food, water and fuel supplies. The women benefit the most from this increased security. It empowers them during times when the men migrate to cities looking for work and the women are left to fend for their homes and their land.

Having a safe water supply, electrical power, and running water in the toilet and bathroom are only the first vital steps. Sustainable livelihoods through locally produced biodiesel pave the way towards a continuum of sustainable development.

This year also saw the completion of one, and the (no cost) extension of two, MDG Research projects awarded in previous periods.

The research teams continue to work on disseminating their findings, sharing valuable information to ensure policymakers, practitioners, government and academia will receive the benefits of their important work.

In addition to these new, completed and ongoing projects, during 2010-2011 Shastri also supported the research team behind Village Level Biodiesel (VLB) in their efforts to consolidate partnerships and develop joint action plans for the replication of their Shastri MDG pilot project.

Sell Oil not Oil Seeds

Dr. Ramani Santharanarayan and Dr. Geeta Vaidyanathan are the powerhouse duo behind Community-based Technologies Exchange fostering Green Energy Partnerships, or CTxGreEn, a small, non-profit, voluntary organization based in Canada. Together with their project partners, Dr. Susan Wimer at the University of Waterloo, Gram Vikas (in India), The Working Centre (in Kitchener, Canada) and SICI, the team has brought sustainable and environmentally friendly energy to some of India’s poorest, most remote tribal villages that sit without access to the electrical grid, roads, primary health care or commercial fuels.

Odisha is one of India’s most impoverished states. The rural villages are in dire need of infrastructure. Large-scale deforestation has also left the indigenous peoples’ ecosystems depleted. Villagers in Odisha have no running water and rely on the same ponds for all their water needs, from cooking and drinking to bathing and washing. Understandably, this causes poor sanitary conditions and subsequent health issues. By producing biodiesel from seed oil, the villagers are able to pump water and generate electricity. But this is only the beginning. The true benefits of biodiesel production at the village level lie in the mechanization of agriculture, promoting and adding value to the production of oilseeds and using the by-product oilcake as an organic substitute for chemical fertilizers. All these efforts individually and collectively promote sustainable agricultural practices.

By ‘demystifying technology,’ the team works with villagers to promote the use of locally available and under-utilised natural and agricultural resources. Human-powered machines (hand-operated seed oil presses and pedal-driven reactors) extract the oil from locally harvested and forest nuts. The oil is then converted into environmentally friendly ready-to-use biodiesel.

The project's unique approach links two vital themes: achieving Millennium Development Goals and addressing challenges posed by climate change. The ‘productive livelihoods’ model that CTxGreEn has developed is not just applicable in infrastructure-deficient, food-starved communities like Odisha. It is equally applicable in any context where reducing material movement and over-consumption hold the key to reducing our environmental footprint. CTxGreEn is now on the threshold of replicating their model, by scaling-out (to other villages in Odisha, India and Africa) and scaling-up (by adding to the basket of biodiesel-based livelihood opportunities).

Better health, environmental sustainability, financial opportunity, regenerated ecosystems, empowering women and youth, and promoting self-reliance...the Shastri Indo-Canadian Institute is proud to support CTxGreEn.
Through education and research, the Shastri Institute has been building connections between Canadians and Indians for over 40 years. We encourage meaningful exchanges and explorations of each other’s unique cultures, traditions, languages and arts.

Building on Momentum

This year, we took great pride in initiating and implementing an historic series of events whose impact will continue to open doors and provide valuable opportunities for further education, research collaboration, knowledge sharing and mutually beneficial strategic partnering for both our countries.

Strengthening Bonds

Memorandum of Understanding Concerning Cooperation in Higher Education

Recognizing the value and role that higher education has in our global knowledge-based economy, the Government of Canada and the Government of the Republic of India signed this MOU on June 27, 2010. Through the MOU, the governments agreed to ‘encourage the continued development of contacts and cooperation between the higher education institutions of the two countries’. In the MOU, the Shastri Institute was acknowledged for its efforts in promoting bilateral education linkages since 1968. The MOU recognizes that this kind of institutional cooperation strengthens relations and complements other bilaterally productive initiatives between our two countries. Shastri has been at the forefront of these kinds of activities for over four decades.

Celebrating Friendship

2011 The Year of India in Canada

On behalf of the Government of Canada, Prime Minister Stephen Harper marked 2011 as the Year of India in Canada. The Shastri Institute, in partnership with the High Commission of India in Ottawa, is honoured to take a strong and active role in supporting and promoting special cultural festivities and esteemed artistic presentations throughout the year and across the nation.

Linking Two Great Nations

Ottawa, is honored to take a strong and active role in supporting increased knowledge and understanding of Canada abroad by allowing individual Indian scholars to travel to Canada:

Canadian Studies Fellowship Program

The Shastri Institute administers three grant programs designed to increase knowledge and understanding of Canada abroad by allowing individual Indian scholars to travel to Canada:

The Faculty Enrichment Program assists academics in developing course content about Canada for use in delivering their Canadian Studies programs in India.

The Faculty Research Program supports individual academics in carrying out short-term research about Canada’s bilateral/multilateral relations and the publication of that research in the scholarly press abroad.

The Doctoral Student Research Award aids full-time graduate students, whose dissertations are substantially related to Canada, in their doctoral research project.

In 2010-2011, the Shastri Institute awarded 11 fellowships worth over $70,000.

Canadian Studies Directors’ Workshop

March 30 & 31, 2011 – India International Centre, New Delhi

Designed to raise the profile of Shastri’s Canadian Studies fellowship programs throughout our 24 Canadian Studies Centres in India, Shastri’s India office hosted this information sharing and networking workshop. The eighteen representatives identified opportunities for building Canadian Studies research development capacity and using social media as a cost-effective outreach tool. They also emphasized the importance of developing high-quality, creative and innovative projects, in particular, projects that relate to Canada’s foreign policy. All participants agreed that ongoing dialogue is the key to continuous improvement, ensuring information is disseminated and new ideas are generated.

Canadian Studies Visiting Lecturers Program

To help strengthen their Canadian Studies programs, academics from our Indian member institutions annually nominate established and emerging Canadian scholars to visit India and share their expert knowledge. In 2010-2011, Shastri awarded grants to two Canadian academics to deliver lectures and share ideas on topics in demand by India’s academic community.

Understanding Canada: Canadian Studies in India

Canadian Studies Fellowship Program

The Shastri Institute administers three grant programs designed to increase knowledge and understanding of Canada abroad by allowing individual Indian scholars to travel to Canada:

The Faculty Enrichment Program assists academics in developing course content about Canada for use in delivering their Canadian Studies programs in India.

The Faculty Research Program supports individual academics in carrying out short-term research about Canada’s bilateral/multilateral relations and the publication of that research in the scholarly press abroad.

The Doctoral Student Research Award aids full-time graduate students, whose dissertations are substantially related to Canada, in their doctoral research project.

In 2010-2011, 24 fellowships were awarded. Karl-Stephan Bouthillette (India Studies Student Language Training Fellow) wanted to further his Sanskrit studies at the Landour Language School in Mussoorie, India. For one year, he undertook the enormous and challenging task of memorizing this ancient language’s complex alphabetical and grammar systems. Combined with his knowledge of Tibetan language, mastering Sanskrit will enable him to undertake a PhD in Indo-Tibetan Buddhism. Equally important are the contacts with the institutions and communities with whom he will continue to interact throughout the course of his academic career.

Understanding India: India Studies in Canada

India Studies Fellowship Program

The India Studies Fellowship program provides first-hand opportunities for Canadian scholars, academics and artists to share and exchange culture, language, knowledge and professional expertise with their Indian counterparts. Upon their return to Canada, our grant recipients often describe their experience in India as ‘life-changing’. From librarians and performing artists to students and faculty members; our India Studies Fellows bring back experiences that are wide-ranging and highly inclusive. This is one of Shastri’s most popular programs as is evidenced by the more than 30 applications we receive year after year.

Making Knowledge Accessible

Dissemination is Shastri’s mandate

Investing in students and researchers to further their intellectual understanding while strengthening bi-national networks would not be complete without spending the benefits of these efforts. Dissemination maximizes our resources and ensures the work we do impacts the lives of the peoples of our two great nations. Through the coordination of special symposia, workshops, lectures, and residencies, Shastri ensures our academics are provided with opportunities and venues to communicate their specialised knowledge to a broader audience outside their immediate circle of experts. Our Book & Journal Program offers extensive resource materials to encourage scholarly inquiry, support teaching, and promote greater understanding of Canadian Studies in India and Indian Studies in Canada.

Scholars pave the way

Engaging India: A Series of Regional Symposia

One of Shastri’s core beliefs is that universities working together to promote research in all areas facilitates the advancement of sustainable social and economic development. We recognize that academic research not only plays a vital role in influencing development-related policies, processes and programs in India and Canada, but also sets us up for success when implementing these initiatives.

Shastri’s current Strategic Action Plan includes the delivery of eight to ten regional workshops throughout Canada and India with two substantive national/international events. The themes of these initiatives are selected to address our strategic priorities, such as health and food security. The 125 participants also included scholars working in Agriculture, the Arts, Engineering, Health Sciences, the Humanities and Social Sciences disciplines. Industry and government representatives from both countries joined in the discussions and presentations that showcased bi-national collaborations currently underway in India and Canada.

Saskatoon Symposium

On October 28 - 29, 2010 at the University of Saskatchewan, Shastri officially launched its first in a series of regional Canadian symposia. Co-sponsored by Shastri, with assistance from Enterprise Saskatchewan and International Science and Technology Partnership Canada, the Prairies regional conference brought together Indian and Canadian faculty members and researchers specializing in sustainable technologies including bio-energy and bio-products. The 125 participants also included scholars working in Agriculture, the Arts, Engineering, Health Sciences, the Humanities and Social Sciences disciplines. Industry and government representatives from both countries joined in the discussions and presentations that showcased bi-national collaborations currently underway in India and Canada.

Halifax Roundtable

On March 25, 2011 Shastri’s Atlantic Region member universities got together. Topics of discussion included the importance of the Government of Canada’s recent efforts to increase the profile of its relationship with India. Also discussed was India’s impetus to promote education as the greatest weapon of change in securing the country’s future success. As 70% of India’s population is under the age of 26, it has an extremely large pool of potential international students. This poses a daunting challenge on financially strapped Canadian universities, but also an immense opportunity. The participants identified key strengths in developing innovative strategies:

Shastri has the network to promote the high quality of education in Canada

Excellence in education is a vital export for Atlantic Canada

Engaging Indian students has the potential to draw considerable intellectual and social capital into Canada

Kanta Marwah Lecture Series

Established by an endowment from Dr. Kanta Marwah, this high-profile annual lecture is alternately hosted by Canadian and Indian universities. The lecture events allow prominent Indian and Canadian experts to share and exchange their knowledge and expertise with a global audience and foster international discussion. Topics are based on contemporary issues of mutual importance to Canada and India.

On February 3, 2011, Dr. Dinesh Singh, Vice Chancellor at the University of Delhi and one of India’s most acclaimed and famous academics, presented a lecture titled ‘Education in the 21st Century’. The theme of the lecture was inspired by the signing of a Memorandum of Understanding on higher education between the governments of Canada and India. Prof. Singh highlighted that higher education needs expansion. A university education in India, as well as other countries around the globe, should be inclusive, for all members of society.

Shastri-Lester Pearson Memorial Lecture

He has been recognized by Time Magazine as one of the three most influential Indians of the 20th Century. The United Nations Environment Program referred to him as the ‘Father of Economic Ecology.’ With more than 50 honorary doctorate degrees from universities around the world, the Shastri Institute had the exceptional honour and privilege of awarding the Shastri-Lester Pearson Memorial Lecture grant to the University of Alberta (U of A) in order to bring Professor M. S. Swaminathan to Canada.

In October of 2010, this living legend and world scientist of rare distinction travelled to Edmonton to share his views on food security and safety at the event titled: Bently/Shastri-Lester Pearson Memorial Lecture. The capacity filled auditorium listened attentively while Professor Swaminathan spoke on the role of biotechnology, the competition between food and biofuel crops for arable land, the impact of global climate change and the empowerment of under-represented communities (rural, aboriginal, women).

The U of A is striving to enhance research and educational collaboration with partner institutions around the globe. Through SICI’s support, key agricultural and environmental academic and government representatives were able to explore the possibility of establishing research linkages for Canadian students at the M. S. Swaminathan Research Foundation (MSSRF) in Chennai, India. Professor Swaminathan’s visit catalyzed a new international partnership toward developing the next generation of international stews for global food security and the environment.

Faculty Mobility Program

Canadian and Indian faculty members from all disciplines are eligible for this program. Designed to bring an international perspective to curriculum while providing scholars the opportunity to share recent developments in their field of expertise, grant recipients travel to a host university, college or research institution in Canada/India where they may teach courses and/or offer a series of seminars.

Below: Shastri Executive Director, Michèle Neider presents at the Atlantic Canada Engaging India Regional Roundtable at St. Mary’s University in Halifax, Nova Scotia

Professor Monikombu Sambasivam Swaminathan delivering the combined Bentley Lecture in Sustainable Agriculture as recipient of the Bently/Shastri-Lester Pearson Memorial Lecture at U of A after receiving an honorary doctorate.

Professor Swaminathan met with Premier Stelmach and other senior members of the Alberta Government where he was able to convey the importance of agriculture and the environment as well as tackling the many issues we face in these sectors, globally.

Significant synergy exists between environmental and agricultural research conducted at the U of A and MSSRF making it a ‘natural marriage’ between the two institutions.

Left: Dr. Rangaraj M. Rangayyan, Department of Electrical and Computer Engineering, University of Calgary Faculty Mobility Program grant recipient

Dr. Rangaraj M. Rangayyan is a Professor with the Department of Electrical and Computer Engineering, and an Adjunct Professor of Surgery and Radiology, at the University of Calgary. For over 20 years, he has been working in the areas of biomedical signal and image analysis and computer-aided diagnosis. In November 2010, a Shastri Faculty Mobility Program grant took him to India where he was able to share his research on studying mammograms. Aimed at improving the diagnostic accuracy of mammography for the early detection of breast cancer, he has developed computer engineering techniques that improve image quality and aid in distinguishing abnormalities. During his six week stay, Prof. Rangayyan attended numerous workshops, discussion sessions, demonstrations and conferences with students and research staff. In addition to delivering over a dozen tutorial lectures and seminars, Dr. Rangayyan made important contacts and connections that have resulted in further Indo-Canadian exchanges.

On February 3, 2011, Dr. Dinesh Singh, Vice Chancellor at the University of Delhi and one of India’s most acclaimed and famous academics, presented a lecture titled ‘Education in the 21st Century’. The theme of the lecture was inspired by the signing of a Memorandum of Understanding on higher education between the governments of Canada and India. Prof. Singh highlighted that higher education needs expansion. A university education in India, as well as other countries around the globe, should be inclusive, for all members of society.

Centre: Karl-Stephan Bouthillette, India Studies Student Language Training Fellow
Right: CTxGrel Self Help Group exchange visit - vote for forest protection

“Shastri plays a vital and ongoing role in connecting researchers in India and Canada and facilitating scholarly exchange and interaction. In my own case SICI has supported my research for the last decade, and has been central to my ability to conduct field work as both a PhD student and now as a tenure faculty member. The conference Laurier hosted in 2011 was also well attended by Indian delegates due to the travel subsidy offered by SICI.”
Dr. Margaret Walton-Roberts

Partnership Development Seed Grant Project

“Our Partnership Seed Grant for the project titled: ‘Health Risks in South Asia: How Best to Overcome the Vulnerability of Poverty’ helped us in brainstorming relevant issues in this area. We were able to develop clear, realistic research ideas and questions about micro health insurance as a mechanism to address the issue of vulnerability to poverty which we can pursue in the near future. Now, we are a highly functioning group of academics and practitioners exchanging ideas and research findings.” - Debasish Acharya, PDSG Indian Partner

Left to Right: Deepti K C - IFMR, Chennai, Rosina Nasir - CSSEIP, University of Hyderabad, Syed Ahsan - Concordia University (PDSG Canadian partner), Shailendra Singh Bishl, ICFI Business School, Debasish Acharya, University of Hyderabad
“The Shastri Institute has been like a family to me, for years now. It is here that I have spent most of the last 14 years of my life. As the Institute has grown over the years (from 23 to 92 members), so have I – from a young, single woman to a married mother of two wonderful children aged eight and ten years. Working at Shastri is not just a job for me, but an essential part of my life.” ~ Anju Taneja – Finance Officer, Shastri India Office

From left to right: Michèle Neider - Executive Director, Mahmuda Aldeen - Program Officer, Canada Office, Sanghamitra Jana Chatterjee - Library Program Officer, India Office, Anju Taneja - Finance Officer, India Office
