Durgesh Singh

Project: **Performance Management and Load Balancing in Mobile Cloud Computing'**

Grant Awarded: SRSF –Doctoral (2016- 17) 560 CAD $ /1 months

"This fellowship provided me a great opportunity to interact and work with people of great knowledge in their respective research areas. Apart from academics, it also provided me the knowledge of various traditions and activities practiced in Canada. I would also like to express my gratitude to all the SICI members for their full support during the project."

The project as a whole provided me an opportunity to interact with many scholars and researchers with similar area of interest, which enhanced my observation and problem solving skills. Also, it is expected that the work done during this project will lead to a publication which will be partially helpful in my Ph.D. dissertation. I am already in touch with the people there and we are planning for a concrete collaborative work.
