Project: A novel approach for enhancing the efficiency of crude oil recovery techniques by nanoparticle stabilized pickering emulsions (nanofluids)

Grant Awarded: SRSF –Post -Doctoral (2016- 17) 590 CAD \$ / 17 weeks

This kind of visiting research programme is definitely help in collaboration with Canadian institute. This programme has been catalysed the knowledge shearing and academic culture exchange between the Indian and Canadian institute. Personally, I have gained valuable research as well as academic insights which would help to enrich my research outlook.
